Pierre Payet

FULLSTACK SOFTWARE ENGINEER

4+ years of experience

Lyon, France — Fully remote available
Email: **pierre.payet@outlook.com**
Phone: **+33 7 67 47 49 64**
Portfolio: **https://pierrepayet.dev**

Product-oriented fullstack engineer with over 4 years of experience, in startup, public service, media and small business contexts. Specialized in TypeScript and Node.js, I work on web applications and APIs used at scale, from design to production maintenance. Autonomous and proactive, with a strong focus on product impact, code quality, best practices, testing, and close collaboration with product and business teams.

PROFESSIONAL EXPERIENCES

Full-Stack Software Engineer - Freelance

Adtractive Group — *Lyon, France (full remote) — December 2025 to today*

Adtractive Group operates several hundred digital advertising panels across France. I am currently assisting the company with its project to integrate an embedded artificial intelligence module, coupled with a camera, into its digital screens. The goal is to implement a dynamic advertising targeting system capable of automatically adapting the displayed advertisements based on the estimated profile (gender and age range) of people standing in front of the panel.

- Gather business requirements and translate them into technical specifications.
- Writing technical and architectural documents.
- Development of the frontend interfaces in React for the AI Targeting feature.
- Development of the backend API in Node.js (Express.js) to manage the AI Targeting feature.
- Integration of the AI Targeting feature into the existing Player application inside the digital screens.
- Ensure project quality and compliance with best practices.

Technologies and methods: React , Node.js , Express.js , Jest , Sequelize , MariaDB , AWS , Cursor , Electron

Full-Stack Software Engineer — Permanent Contract

Inicio — *Lyon, France (full remote) — January 2025 to December 2025*

Startup developing an algorithm to identify high-potential sites for photovoltaic projects through large-scale territorial analysis, and building a SaaS platform used by solar developers across Europe.

- End-to-end feature implementation: development of frontend and backend.
- Participation in the design and writing of technical and architectural documents.

- Code review and technical documentation.
- Technical debt management.
- Application maintenance and bug resolution.
- Technical KPIs tracking and improvement: performance, security, stability, scalability and Developer Experience (DevX).
- Implementation of metrics and alerts via AWS CloudWatch and incident analysis to improve system reliability.
- Participation in agile rituals and architecture discussions.
- Organisation of a weekly reading club around Software Craftsmanship (TDD, Clean Code) to foster the sharing of best practices within the team.
- Use of AI-assisted development tools, while maintaining full mastery and control of the produced code.

Technologies and methods: TypeScript, Node.js, NestJS, React, Jest, TypeORM, Docker, AWS, Cursor, Hexagonal Architecture, monorepo, Agile method

Web Developer — Freelance

Métropole de Lyon — *Lyon, France (hybrid remote) — March 2023 to January 2025*

Digital platform (ENT laclasse.com) used by public schools across the metropolitan area.

- Development and improvement of features on an existing product.
- Creation of a feature catalog application for educational institutions.
- Evolutionary and corrective maintenance.
- Close collaboration with product and business teams.

Technologies and methods: TypeScript, Web Components, SQL, PHP, Docker, Agile method

Web Back-End Developer — Apprentice / Fixed-term Contract

Euronews — *Lyon, France (hybrid remote) — September 2021 to December 2022*

Apprenticeship followed by a fixed-term contract within the Software Design and Development team.

- Development and improvement of features on internal tools and platforms.
- Development of backend APIs in Node.js (Express).
- Participation in the migration of the infrastructure to AWS.
- Writing Python scripts for the migration of large data volumes (≈ 20 To).

Technologies and methods: Node.js, TypeScript, Express.js, Angular, Jest, Sequelize, AWS, OpenSearch, SQL, Python, Agile method

Software Designer & Developer — Apprentice

Synergies-Tech — *Saint-Priest, France (hybrid remote) — September 2020 to August 2021*

- Development and improvement of a business mobile application with ERP API integration.
- Specific development on open source ERP (Dolibarr).
- System and network administration.

Technologies and methods: Vue.js, Sequelize, PHP, Hyper-V, Dolibarr

EDUCATION

Master of Science (MSc) in Technological Innovation (Bachelor +5)

Epitech

Lyon, France — 2020 to 2022

Bachelor's Degree in Computer Science (Bachelor +3)

Claude Bernard University Lyon 1
Lyon, France — 2019 to 2020

DUT in Networks & Telecommunications (Bachelor +2)

Savoie Mont Blanc University
Annecy-le-Vieux, France — 2016 to 2018

TECHNICAL SKILLS

Languages

- TypeScript, JavaScript
- SQL
- Python

Backend

- Node.js, NestJS, Express.js
- Design and implementation of REST APIs
- PostgreSQL, MySQL, TypeORM

Frontend

- React, Next.js
- Vue.js, Nuxt.js
- Angular
- HTML5, CSS3, Tailwind CSS

Quality and Testing

- Unit tests (Jest), integration tests and E2E tests
- Clean Code (SOLID, KISS, DRY), Hexagonal / Clean Architecture
- Code review, pair programming
- Technical documentation

DevOps and Tools

- Docker
- AWS (CloudWatch, S3, EC2, SES)
- Git (GitHub, GitLab), Monorepo
- CI/CD basics
- Linux environments
- Visual Studio Code, Cursor

Methods

- Agile, Scrum (sprint planning, daily stand-ups, retrospectives)
- Cross-team collaboration (Product, Design, QA)
- Remote-first environments

LANGUAGES

French : native language
English : professional level (written and oral)
