FULLSTACK SOFTWARE DEVELOPER – TYPESCRIPT / NODE.JS

4+ years of experience

Product-oriented fullstack developer with over 4 years of experience. Specialized in TypeScript and Node.js, I work on web applications and APIs used at scale, from design to production maintenance. Autonomous and proactive, with a strong focus on product impact, code quality, best practices, testing, and close collaboration with product and business teams.

PROFESSIONAL EXPERIENCES

Full-Stack Software Engineer — Permanent Contract

Inicio — *Lyon (full remote) — January 2025 to December 2025*

Startup developing an algorithm to identify high-potential sites for photovoltaic projects through large-scale territorial analysis, and building a SaaS platform used by solar developers across Europe.

- End-to-end feature implementation: development of frontend and backend.
- Participation in the design and writing of technical and architectural documents.
- Review code and design documents.
- Technical debt management and reduction.
- Application maintenance and bug fixing.
- Monitoring and improvement of technical KPIs: performance, security, stability, scalability, and Developer Experience (DevX).
- Setup of metrics and alerts using AWS CloudWatch.
- Incident analysis to improve system reliability.
- Participation in agile rituals and architecture discussions.
- Organization of a weekly Software Craftsmanship reading group (TDD, Clean Code) to encourage best practice sharing within the team.
- Use of AI-assisted development tools, while maintaining full mastery and control of the produced code.

Tech & methods: TypeScript, Node.js, NestJS, React, Jest, TypeORM, Docker, AWS, Cursor, Hexagonal Architecture, Monorepo, Agile Method

TECHNICAL SKILLS

Languages

TypeScript, JavaScript

SQL

Python

Backend

Node.js, NestJS, Express.js

Design and implementation of REST APIs

PostgreSQL, MySQL, TypeORM

Frontend

React, Next.js

Vue.js, Nuxt.js

Angular

HTML5, CSS3, Tailwind CSS

Quality & Testing

Unit (Jest), integration and E2E testing

Clean Code (SOLID, KISS, DRY), Hexagonal / Clean Architecture

Code reviews, pair programming

Technical documentation

DevOps & Tools

Docker

AWS (CloudWatch, S3, EC2, SES)

Git (GitHub, GitLab), Monorepo

CI/CD basics

Linux environments

Visual Studio Code, Cursor

Méthodes

Agile, Scrum (sprint planning, daily stand-ups, retrospectives)

Web Developer — Freelance

Métropole de Lyon — *Lyon (hybrid remote) — March 2023 to January 2025*

Digital platform (ENT laclasse.com) used by public schools across the metropolitan area.

- Development and enhancement of features on an existing product.
- Creation of a feature catalog application for educational institutions.
- Corrective and evolutive maintenance.
- Close collaboration with product and business teams.

Tech & methods: TypeScript, Web Components, SQL, PHP, Docker, Agile Method

Backend Web Developer — Apprentice / Fixed-term Contract

Euronews — *Lyon (hybrid remote) — September 2021 to December 2022*

Apprenticeship followed by a fixed-term contract within the Software Design and Development team.

- Development and improvement of internal tools and platforms.
- Backend API development using Node.js (Express).
- Participation in infrastructure migration to AWS.
- Development of Python scripts for large-scale data migration (~20 TB).
- Agile team collaboration.

Tech & methods: Node.js, TypeScript, Express.js, Angular, Jest, Sequelize, AWS, OpenSearch, SQL, Python, Agile Method

Software Designer & Developer — Apprentice

Synergies-Tech — *Saint-Priest (hybrid remote) — September 2020 to August 2021*

- Development and improvement of a business mobile application with ERP API integration.
- Custom developments on open-source ERP (Dolibarr).
- Systems and network administration.

Tech & methods: Vue.js, Sequelize, PHP, Hyper-V, Dolibarr
